

Base map information including bathymetry was compiled by the National Ocean Service (NOS). Bathymetry compiled from 1920 bathymetric surveys (see index). NOS bathymetric survey data conform with International Hydrographic Organization (IHO) Sound Publication 58 accuracy standards as these used at the date of the survey. This information is not intended for navigational purposes.
 Universal Transverse Mercator Grid (Zone 4, 10000 meter scale) is shown inside the mapline.
 Charted position survey data, printed in red, compiled by the Minerals Management Service. Heavy lines indicate lines of 1983 Outer Continental Shelf (OCS) Petroleum Disposal. The projections on this map are not for Federal leasing purposes, but each position refers to the OCS Oil and Gas Lease Diagram available from the Minerals Management Service.
