

Bathymetry compiled by the National Ocean Service (NOS) from bathymetric data other than NOS hydrographic surveys. This information is not intended for navigational purposes. Universal Transverse Mercator Grid, Zone 4, 10,000 Meter Table (1-4) are shown inside the map.

Derickson Seamount series data, printed in red, compiled by the Minerals Management Service. Heavy lines indicate base of MMS Outer Continental Shelf (OCS) Derickson Seamount Diagram. The grid extends out the map area for isolated contour fragments. For such purposes refer to the NOS Official Bathymetric Diagram available from the Minerals Management Service.

EXPLANATION OF BATHYMETRIC DATA

Bathymetric contours are based on bathymetric data collected by the National Ocean Service (NOS) from hydrographic surveys. The bathymetric data were collected by the NOS Hydrographic Survey Vessels (HGSVs) and are plotted on a grid of 10,000 meter intervals. The bathymetric data were collected by the NOS Hydrographic Survey Vessels (HGSVs) and are plotted on a grid of 10,000 meter intervals. The bathymetric data were collected by the NOS Hydrographic Survey Vessels (HGSVs) and are plotted on a grid of 10,000 meter intervals.
